REPLACEMENT PANELS PRICE LIST

All panels are made from 1mm or 1.2mm zinc coated panel steel for better rust protection.

All panels fit the same as the original.

Some panels do have a different shaped swage or pressing to the original.

This does not affect how they fit or how other panels attach to them.

Panels can be made to order if a different thickness of material or size of panel is required.

Panels for other makes and models can be made on request.

NOTE: Sill Panels are made to the first or second fold inside door edge unless stated Full.

Sill Panels marked Full are made to go all the way across the top of the sill and attach to the floor as original.

All Door Skins have a joggled top edge so panel can be overlapped and still give a flush finish or this can be easily trimmed off if a butt weld is required.

All Panels are Made In New Zealand.

ALL PRICES EXCLUDE GST

CHEVROLET
